The reader of this is apparently about the age of the departed, and you cannot help hoping that the spirit designated was not so heavily overweighted with wings as is the headdress of the living, which has an equipment of plumage generous to the point of excess.

Great spreading breasts and wings cover the whole hat, and from a far off vantage point of the Trinity yard look as if a huge bird had lightly settled on the crown and brim. This departure from the normal is the more remarkable as in all other respects the dress of the young business woman is conventional and attractive in the extreme, consisting and attractive in the extreme, consisting of a dark blue suit with three-quarter length cost. a spotless shirtwaist and butterfly tie, chamois gloves and neat

walking boots.

In the group that shares the sunny steps of the Sugar House monument not even this one departure from the regulation mode is duplicated. Everything noted is strictly businesslike, and taking this dozen or so of young women as types it would seem that there was never a time when the difference between the garb of the business woman and that of the woman idler was so distinctly marked. distinctions. Dress helps considerably to these demarcations. For instance, there is the middle aged woman who has given up competition in clothes. There was a time when she too noted current modes in spare moments and studied ways and means zealously. She does so no more. She has let go; for her the days of slippered ease in office hours have come. She depends for her place on her faithfulness, long service and the other virtues that flourish in her calling. Her mind now is taken up with her bank account and her dress shows economy carried to its fullest extent for the enlargement of that surplus.

enlargement of that surplus.

Her favorite head covering is a jet turban made from the remnants of an evening gown. Her shirtwaists are stiff and trees, and could never be described exning gown. Hershirtwaists are stiff and strong and could never be described except on a laundry slip as lingerie. Her shoes, gloves, ties, beits, hatpins and other accessories are plain and serviceable. Her bag is enormous and often helds a piece of crocheting, work she can do in spare moments with a clear conscience.

In this class belong the widowed mothers in shabby crape who are working to support upgrowing families and give them the education their own sense of refine-ment makes necessary, and the wives who are taking care of "husbands out of work." The larger percentage of business women are rated in the class of many thousands who have been five, ter, fitteen years downtown. They believe that good clothes and a well groomed look are necessary assets to success and evidence the struggle that is careried on, each year more desperately, to achieve this result. One of them inter-

It was only a few years ago that hearly every other stenographer at a certain luncheon place on Maiden lane had difficulty in keeping the tendries of her ostrich feather boa from the tomato soup. Later there was an epidemic of chains, chains for the watch or its substitute, chains for the bonbonnière, chains for the this, the that and the other.

Chains and ostrich feather boas are that she has little time or strength left for the home dressmaking and millinory indulged in by her stay at home sisters but is placed in competition with thom socially. She has to pay more for what she buys, for she has no time to hunt bargains. The wear and tear of a daily routine on cars, in the streets, in offices, deplete her apparel quickly.

But with these and other troubles to take into account she exemplifies neatness, not medishness; the beauty in utility which is not style but approaches it; a complete lack of excess in any direction, for she does not show shabby shoes
